#### **DETAILED ACTION**

## Response to Arguments

In view of the appeal breif filed on 7/18/03, PROSECUTION IS HEREBY REOPENED.

An office action based on the newly discovered art is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
  - (2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1,2, 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Stephens.

Art Unit: 3722

Stephens discloses all of the subject matter as set forth in the claims and is identical to the invention as broadly recited. Some of the claimed elements clearly disclosed by the reference are: a security feature (16), a transparent fragile layer(12') and a transparent durable layer (12"). Further Stephens inherently teaches the method in claims 23 and 24.

# Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent art.
  - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 5. Claims 9,12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stephens.

Stephens discloses the claimed invention except for claimed layer materials. It would have been obvious to one having ordinary skill in the art at the time the invention was made to

Application/Control Number: 09/846,632

Art Unit: 3722

use any suitable material, since it has been held to be within the general skill level of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

6. Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stephens in view of Killey.

Stephens discloses the claimed invention except for a holographic foil layer. Killey teaches that it is well known in the art to use a holographic foil layer in its assembly. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Stephens with a holographic foil layer in the manner as taught by Killey in order to enhance the security feature.

7. Claims 4,6,7,8,10,11,14-16,19,20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stephens in view McConville et al..

Stephens discloses the claimed invention except for a retroreflective layer of glass beads. McConville et al teaches that it is well known in the art to use a a retroreflective layer of glass beads (24), hot melt adhesive (32), a protective coating laquer coating and an index coating (26) in his assembly. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Stephens with a retroreflective layer of glass beads beads (24), hot melt adhesive (32), a protective coating laquer coating and an index coating (26) in the manner as taught by McConville et al in order to enhance and protect the security feature.

McConville et al further teaches that it is well known to use a composite assembly of the claimed elements in a document of value (see column 1, lines 25-65).

Application/Control Number: 09/846,632

Art Unit: 3722

8. Claims 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stephens in view of McConville and Killey.

It would have been obvious to a skilled artisan to provide Stephens with a multi-layer optical film layer and a holographic foil layer in the manner as taught by McConville and Killey for the reasons stated in the previous paragraphs.

#### Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

In order to reduce pendency and avoid potential delays, Group 3700 is encouraging FAXing of responses to Office actions directly into the Group...Official- (703)872-9302...After Final-(703) 872 9303. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3700 will be promptly forward to the examiner.

Any inquiries concerning issues other than the substantive content of this and previous communications, such as missing references or filed papers not acknowledged, should be directed to the Customer Service Representative, Tech Center 3700, (703) 306-5648.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Tech Center receptionist whose telephone number is (703) 308-1148.

Art Unit: 3722

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to W. Fridie, Jr. whose telephone number is (703) 308-1866.
